

## Driving with BiOptics, the early years

In 1975-1976, Dr. William Feinbloom addressed the issue of driving with telescopes in the USA. Dr. Feinbloom narrates this short film while driving a vehicle wearing Bioptic Telescopes. His son, Richard Feinbloom, was the cameraman. This film shows different examples of magnification and different visual acuity by reducing the driver's vision to 20/200.

## RICHARD E. FEINBLOOM

Richard and his wife Toni have lived in New York City most of their lives and have two grown children, Abraham and Samantha. Richard was educated at the Institute of Optics in Rochester, New York and Baruch College in New York City. Richard, the son of William Feinbloom, OD, Ph.D., has spent his entire working life in Research and Development of aids for the Partially Sighted and in speaking to various professional and public groups to further the interest of the Low Vision patient. His contributions in the Surgical field are internationally known.
